Buffalo WZR-HP-G450N

Modified on: Wed, 1 Jul, 2015 at 8:15 AM

Please connect an Ethernet cable from your existing router/network in to the port labelled "**Internet**" on the back of the Buffalo.

Then connect an Ethernet cable between port 1 on the back of the Buffalo and your computer

Turn on the router and wait for a few minutes

Open a web browser and type **http://192.168.10.1** in to the address bar

You will be prompted to log-in. The default username is "**admin**" and the password is "**admin**" (unless you have changed these).

Click on "**Administration**" on the left menu

Click on "**Firmware Upgrade**" on the left menu

Click "**Browse**" and select the firmware file that you have been provided

Be sure to set the "**After flashing, reset to**" option to "**Reset to Default Settings**"

Click on "**Upgrade**".

The upgrade process will now begin and take up to 5 minutes to complete, and reboot

Upgrade successful.
Unit is rebooting now. Please wait a moment...
